

UTI-SOLVE

FOOD SUPPLEMENT

Food supplement based on D-mannose and cranberry, Uva ursi and ononis extracts, useful as an adjuvant treatment against urinary tract infections such as cystitis as well as to prevent their relapses.

DESCRIPTION

Food supplement to enhance the **correct functioning and well-being of the urinary tract**, useful as an adjuvant treatment against urinary tract infections such as cystitis, as well as to prevent their relapses.

Based on **cranberry extract** (titrated in 10% proanthocyanidins) to enhance the functioning of the urinary tract and **D-Mannose**, whose synergy works to **prevent the adhesion of bacteria** to the mucosa, and therefore inhibit their proliferation.

Thanks to spiny restharrow extract it further promotes the draining of liquids, increasing urine flow and the **elimination of uropathogen bacteria** through it.

The presence of Uva Ursi extract allows to perform an **emollient and soothing action on urinary tract**, which together with the anti-oxidant properties of cranberry helps **ease the discomforts associated to the infection**.

PLUS

- Supports a healthy functioning of urinary tracts
- Inhibits bacteria adhesion and proliferation
- Promotes draining of liquids
- Emollient and soothing action
- Useful as a preventing treatment against relapses
- The dry extract confers higher drug/extract ratio for a more concentrated action.
- Formulation based on natural ingredients.

gluten free

lactose free

COLORANT FREE

DOSAGE

15 ml twice a day preferably diluted in 500 ml of water for the acute phase; once a day as a preventing treatment.

FORMAT

150 ml bottle with measuring cap and childproof closure.

AVERAGE CONTENT

Average content	15 ml
D-mannose	1 gr
Cranberry d. e.	50 mg
Proanthocyanidins content	5 mg
Onosis d. e.	150 gr
Uva Ursi d. e.	150 gr
Arbutin content	15 mg

INGREDIENTS

- **Cranberry extract:** titrated in 10% proanthocyanidins (PACs) from the type A, it enhances the functioning of urinary tract, fosters the draining of liquids and has anti-oxidant properties.

- **D-Mannose:** naturally-occurring sugar that works in synergy with PACs to prevent the adhesion of bacteria to the mucosa, inhibiting their proliferation.

- **Spiny restharrow (Onosis) extract:** performs an emollient and soothing action on urinary tract and fosters the draining of liquids.

- **Uva ursi extract:** it enhances the functioning of urinary tract and fosters the draining of liquids.

- **FOS:** fibers with prebiotic effect to help rebalance the bacterial vaginal flora and prevent vaginosis, as well as to favor intestinal transit.

- **Citric acid:** it helps to restore the physiological pH of the vagina that tends to be more basic during infections.
